RE: Thank You!

Dear Tom,

I would like to take a moment to express my appreciation for the excellent work that CSI has done for us on the PA Academy of the Fine Arts project, at 128 N. Broad Street, Phila.

Starting with your willingness to think outside of the specifications during bidding on the project, you were able to provide us with some competitive alternates that helped us win the job!

Couple that with efficient setup and staffing for the job, along with prompt installation and completion of your work. Your 'get it done' attitude helped us meet a tight schedule and provide a flat finished floor prior to the start of our other trades. This ultimately allowed us to meet tight tolerances for the large hollow metal door and borrowed light frames that were an integral part of the design scheme.

You may recall that this job involved approximately 25,000 square feet of contiguous floor area with localized variances of as much as 3" in finished elevation throughout the floor. Your personal attention to detail undoubtedly helped provide the successful end result! Thanks to top notch work from firms like CSI, we are looking forward to a long term relationship with our client, and are negotiating with PAFA for the next phase of work in that facility.

Once again, Thanks! I look forward to working with CSI on future projects!

Cordially,

Steven W. Green
Senior Project Manager,
